Forensic Science International, 60 (1993) 207–209
Elsevier Scientific Publishers Ireland Ltd.

SUBJECT INDEX
Volume 60 (1993)

abdominal wall, postmortem interval, resistivity, specific resistance, electrical resistance, skeletal muscle, 163
alcohol, intoxication, speech analysis, science, 97
alcoholism, ketoacidosis, 3
alkylation, methamphetamine, phenyl-2-propanone, methylamine, *N*-benzylmethamphetamine, benzphetamine, synthesis, reduction, hydrogenolysis, 155
analysis, explosives, stability, residues, 127
analysis, MDMA, 3,4-methylenedioxymethylamphetamine, impurities, synthesis, 189
anaphylaxis, diclofenac, non-steroidal anti-inflammatory drugs, hypersensitivity, 107
antemortem dental register, identification, computer, cooperation, 15
atherosclerotic aneurysm, intrapulmonary, rupture, haemoptysis, sudden death, 121
autopsy, bone strength, osteogenesis imperfecta, infants, SIDS, 111
autopsy, HIV, postmortem, contamination, blood, effusion, 61

benzphetamine, methamphetamine, phenyl-2-propanone, methylamine, *N*-benzylmethamphetamine, synthesis, reduction, hydrogenolysis, alkylation, 155
N-benzylmethamphetamine, methamphetamine, phenyl-2-propanone, methylamine, benzphetamine, synthesis, reduction, hydrogenolysis, alkylation, 155
blood, HIV, autopsy, postmortem, contamination, effusion, 61
bone strength, osteogenesis imperfecta, infants, SIDS, autopsy, 111
brain microdialysis, dopamine, serotonin, postmortem changes, 183

computer, identification, antemortem dental register, cooperation, 15
contamination, HIV, autopsy, postmortem, blood, effusion, 61
cooperation, identification, computer, antemortem dental register, 15

D1S80, DNA, VNTR (variable number of tandem repeats), PCR (polymerase chain reaction), population data, Danish caucasians, 47
Danish caucasians, DNA, VNTR (variable number of tandem repeats), PCR (polymerase chain reaction), D1S80, population data, 47
daughter ion scan, quantitative analysis, explosives, liquid chromatography, thermospray mass spectrometry, tandem mass spectrometry, selected reaction monitoring, 7
dental radiology, tooth protection, tunnelling technique, 57
development, fingerprints, 1,8-diazafluoren-9-one, DFO, 141
DFO, fingerprints, development, 1,8-diazafluoren-9-one, 141
diatom, drowning, ultrasonic irradiation, solubilizer, 91
1,8-diazafluoren-9-one, fingerprints, development, DFO, 141
diclofenac, anaphylaxis, non-steroidal anti-inflammatory drugs, hypersensitivity, 107
DNA, VNTR (variable number of tandem repeats), PCR (polymerase chain reaction), D1S80, population data, Danish caucasians, 47
DNA, VNTR, single locus DNA probes, immigration cases, population frequencies in Turks, 23
DNA polymorphisms, minisatellites, VNTRs, 37
dopamine, serotonin, postmortem changes, brain microdialysis, 183
drowning, diatom, ultrasonic irradiation, solubilizer, 91
drowning, ecstacy, suicide, psychosis, 5
drowning, forensic diagnosis, plankton, proteinase K, sodium dodecyl sulphate (SDS), 81

ecstacy, suicide, psychosis, drowning, 5
effusion, HIV, autopsy, postmortem, contamination, blood, 61

electrical resistance, postmortem interval, resistivity, specific resistance, abdominal wall, skeletal muscle, 163
europium fluorescence, fingerprints, human skin, 67
explosives, quantitative analysis, liquid chromatography, thermospray mass spectrometry, tandem mass spectrometry, daughter ion scan, selected reaction monitoring, 7
explosives, stability, analysis, residues, 127

fingerprints, development, 1,8-diazafluoren-9-one, DFO, 141
fingerprints, europium fluorescence, human skin, 67
forensic diagnosis, drowning, plankton, proteinase K, sodium dodecyl sulphate (SDS), 81

haemoptysis, atherosclerotic aneurysm, intrapulmonary, rupture, sudden death, 121
HIV, autopsy, postmortem, contamination, blood, effusion, 61
human skin, fingerprints, europium fluorescence, 67
hydrogenolysis, methamphetamine, phenyl-2-propanone, methylamine, *N*-benzylmethamphetamine, benzphetamine, synthesis, reduction, alkylation, 155
hypersensitivity, diclofenac, anaphylaxis, non-steroidal anti-inflammatory drugs, 107

identification, computer, antemortem dental register, cooperation, 15
immigration cases, DNA, VNTR, single locus DNA probes, population frequencies in Turks, 23
impurities, MDMA, 3,4-methylenedioxymethylamphetamine, synthesis, analysis, 189
infant immune system, postmortem serum selenium concentrations, Sudden Infant Death (SID), 179
infants, bone strength, osteogenesis imperfecta, SIDS, autopsy, 111
intoxication, speech analysis, alcohol, science, 97
intrapulmonary, atherosclerotic aneurysm, rupture, haemoptysis, sudden death, 121

ketoacidosis, alcoholism, 3

liquid chromatography, quantitative analysis, explosives, thermospray mass spectrometry, tandem mass spectrometry, daughter ion scan, selected reaction monitoring, 7

MDMA, 3,4-methylenedioxymethylamphetamine, impurities, synthesis, analysis, 189
methamphetamine, phenyl-2-propanone, methylamine, *N*-benzylmethamphetamine, benzphetamine, synthesis, reduction, hydrogenolysis, alkylation, 155
3,4-methylenedioxymethylamphetamine, MDMA, impurities, synthesis, analysis, 189
methylamine, methamphetamine, phenyl-2-propanone, *N*-benzylmethamphetamine, benzphetamine, synthesis, reduction, hydrogenolysis, alkylation, 155
minisatellites, DNA polymorphisms, VNTRs, 37

non-steroidal anti-inflammatory drugs, diclofenac, anaphylaxis, hypersensitivity, 107

osteogenesis imperfecta, bone strength, infants, SIDS, autopsy, 111

PCR (polymerase chain reaction), DNA, VNTR (variable number of tandem repeats), D1S80, population data, Danish caucasians, 47
phenyl-2-propanone, methamphetamine, methylamine, *N*-benzylmethamphetamine, benzphetamine, synthesis, reduction, hydrogenolysis, alkylation, 155
plankton, forensic diagnosis, drowning, proteinase K, sodium dodecyl sulphate (SDS), 81
population data, DNA, VNTR (variable number of tandem repeats), PCR (polymerase chain reaction), D1S80, Danish caucasians, 47
population frequencies in Turks, DNA, VNTR, single locus DNA probes, immigration cases, 23
postmortem, HIV, autopsy, contamination, blood, effusion, 61
postmortem changes, dopamine, serotonin, brain microdialysis, 183
postmortem interval, resistivity, specific resistance, electrical resistance, abdominal wall, skeletal muscle, 163
postmortem serum selenium concentrations, infant immune system, Sudden Infant Death (SID), 179
proteinase K, forensic diagnosis, drowning, plankton, sodium dodecyl sulphate (SDS), 81
psychosis, ecstacy, suicide, drowning, 5

quantitative analysis, explosives, liquid chromatography, thermospray mass spectrometry, tandem mass spectrometry, daughter ion scan, selected reaction monitoring, 7

reduction, methamphetamine, phenyl-2-propanone, methylamine, *N*-benzylmethamphetamine, benzphetamine, synthesis, hydrogenolysis, alkylation, 155
residues, explosives, stability, analysis, 127
resistivity, postmortem interval, specific resistance, electrical resistance, abdominal wall, skeletal muscle, 163
rupture, atherosclerotic aneurysm, intrapulmonary, haemoptysis, sudden death, 121

science, intoxication, speech analysis, alcohol, 97
selected reaction monitoring, quantitative analysis, explosives, liquid chromatography, thermospray mass spectrometry, tandem mass spectrometry, daughter ion scan, 7
serotonin, dopamine, postmortem changes, brain microdialysis, 183
SIDS, bone strength, osteogenesis imperfecta, infants, autopsy, 111
single locus DNA probes, DNA, VNTR, immigration cases, population frequencies in Turks, 23
skeletal muscle, postmortem interval, resistivity, specific resistance, electrical resistance, abdominal wall, 163
sodium dodecyl sulphate (SDS), forensic diagnosis, drowning, plankton, proteinase K, 81
solubilizer, drowning, diatom, ultrasonic irradiation, 91
specific resistance, postmortem interval, resistivity, electrical resistance, abdominal wall, skeletal muscle, 163
speech analysis, intoxication, alcohol, science, 97
stability, explosives, analysis, residues, 127
sudden death, atherosclerotic aneurysm, intrapulmonary, rupture, haemoptysis, 121
Sudden Infant Death (SID), postmortem serum selenium concentrations, infant immune system, 179
suicide, ecstacy, psychosis, drowning, 5
synthesis, MDMA, 3,4-methylenedioxymethylamphetamine, impurities, analysis, 189
synthesis, methamphetamine, phenyl-2-propanone, methylamine, *N*-benzylmethamphetamine, benzphetamine, reduction, hydrogenolysis, alkylation, 155

tandem mass spectrometry, quantitative analysis, explosives, liquid chromatography, thermospray mass spectrometry, daughter ion scan, selected reaction monitoring, 7
thermospray mass spectrometry, quantitative analysis, explosives, liquid chromatography, tandem mass spectrometry, daughter ion scan, selected reaction monitoring, 7
tooth protection, dental radiology, tunnelling technique, 57
tunnelling technique, tooth protection, dental radiology, 57

ultrasonic irradiation, drowning, diatom, solubilizer, 91

VNTR (variable number of tandem repeats), DNA, PCR (polymerase chain reaction), D1S80, population data, Danish caucasians, 47
VNTR, DNA, single locus DNA probes, immigration cases, population frequencies in Turks, 23
VNTRs, DNA polymorphisms, minisatellites, 37
